## Who It Is For

---

-  Homeowners with pets needing daily cleaning
-  Busy parents seeking hands-free maintenance
-  Individuals with mobility challenges
-  Those wanting to avoid vacuuming manually
-  Users with moderate-sized homes
-  People who prioritize smart home integration

## Who It Is Not For

---

-  Users with extremely large homes
-  Those needing specialized carpet cleaning
-  People who prefer manual vacuum control
-  Individuals with very high dirt accumulation
-  Users requiring commercial-grade cleaning

## Trade Offs to Consider

---

-  Limited to 200 minutes of battery life
-  Does not handle thick pet hair effectively
-  Requires periodic filter replacements
-  No built-in dustbin for debris collection
-  Smaller cleaning width than premium models
-  Basic app features compared to advanced systems

## Users Say

---

### ● POSITIVES

- ✓ Easy to set up and use
- ✓ Navigates around furniture well
- ✓ Cleans high-traffic areas effectively
- ✓ Returns to charging base automatically

---

### ● COMPLAINTS

- ⚠ Battery life could be longer
- ⚠ No app alerts for filter changes
- ⚠ Limited voice command options
- ⚠ Does not climb stairs

## How It Compares

---

- Better than Roomba 600 series suction power
- Less advanced than Roomba iSeries models
- More affordable than premium robotic vacuums
- Easier to use than traditional vacuums
- Fewer features than top-tier competitors
- More compact than larger models

## Choose This If...

---

- ✓ You need basic smart cleaning automation
- ✓ Your home has moderate dirt accumulation
- ✓ You want voice control integration
- ✓ You prefer app-based scheduling
- ✓ You need anti-fall protection

## Skip This If...

---

- ✗ You require commercial-grade cleaning
- ✗ You have very large floor spaces
- ✗ You need thick carpet cleaning
- ✗ You prefer manual vacuum control
- ✗ You want advanced AI navigation
